PROFESSIONAL SUMMARY

Motivated engineering student with a strong foundation in Python programming, data handling, and problem-solving. Experienced in developing academic projects, including an AI-based chatbot for college assistance, with an interest in software development and emerging technologies. Quick learner with good analytical and communication skills, seeking opportunities to apply technical knowledge in real-world applications. Aiming to build a career in the tech industry while continuously enhancing skills in programming and innovation.

EXPERIENCE

SKILLS

C | C++ | Java | My SQL | Problem solving | Generative AI | Project Management

PROJECTS

AI Chatbot for College Assistance

Developed an AI-based chatbot using Python to assist students with common college-related queries such as course information, schedules, and basic guidance. Implemented simple Natural Language Processing (NLP) techniques to understand user input and provide relevant responses. The project focused on improving accessibility of information and enhancing user interaction through an automated support system.

ACHIEVEMENTS

- Successfully completed an academic project on AI Chatbot for College Assistance. Participated in college-level technical events and workshops. Consistently maintained good academic performance in engineering coursework.

CERTIFICATIONS

- **Python for Beginners** — Infosys Springboard
- **AI Fundamentals** — Infosys Springboard

EDUCATION

Bachelor of engineering in Information science engineering Aug 2028
Atria Institute of Technology
GPA: 8.5
